CONSTRUCTION  
PRODUCTS

# ABOUT US

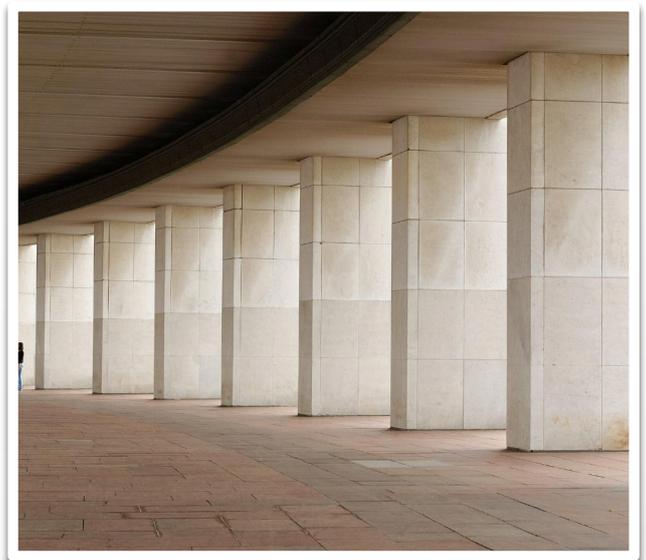

We provide high-quality construction chemicals designed to improve the strength, durability, and performance of modern buildings and infrastructure.

Our solutions help contractors, engineers, and developers build structures that last longer and perform better in challenging environments.

From waterproofing to concrete repair, our products are trusted across residential, commercial, and industrial construction projects.

Our mission is to deliver reliable construction chemical solutions that enhance construction quality, reduce maintenance costs, and improve long-term structural performance.

Stronger Buildings Start With the Right Chemicals

# CONSTRUCTION CHEMICALS

## INGUARD Crystalline Admix

### FIELD OF APPLICATION

- Concrete structure waterproof
- Basements, Foundations, Pools, tanks
- Use at the time of concrete by adding to the concrete as a admix for a water proof structure

### KEY BENEFITS

- Economical
- Part of the concrete
- No challenges of water leakage after the construction
- Environmentally friendly

## DRYBITUMEX R650 Rubberized Bituminous Coating

### FIELD OF APPLICATION

- Building foundation damp proofing
- Retain wall protection from soil and dampness
- Vapor barrier for substructure and super structure
- Termite resistance

### KEY BENEFITS

- User friendly -easy brush/roller apply
- No damp rise in future for paint-off
- Complete damp proof of the building
- Vapor barrier

# CONSTRUCTION CHEMICALS

## HIGH BOND SBR SBR Bonding Agent

### FIELD OF APPLICATION

- General concrete repair by adding to the repair mortar/to use as adhesion promoter of mortar to the concrete  
For plasters in pools, tanks
- Admix to the screed and plaster as a waterproof
- Flooring screed, screening

### KEY BENEFITS

- Ensures bonding of repairs, renders and floor toppings
- Reduces shrinkage and cracking of concrete
- Prolonged corrosion protection
- Excellent adhesion and water resistant

## SEALFLEX Construction Sealant

### FIELD OF APPLICATION

- Sealing of vertical and horizontal concrete joints
- Expansion joints in medium to heavy traffic areas
- Precast concrete joints, curtain wall panels  
Prevent water from entering the sealed joints

### KEY BENEFITS

- Weather proof and low shrinkage
- One part and self levelling
- Chemical and fuel resistant
- UV resistant

# CONSTRUCTION CHEMICALS

## CURECRETE

Concrete Curing & Sealing Agent

### FIELD OF APPLICATION

- Roof slab concrete
- Floor concrete screed/topping
- Retain walls
- Prefab elements

### KEY BENEFITS

- Fast track and no water bed required
- Minimize shrinkage and surface cracking
- Improved durability of the concrete
- Improved concrete surface appearance

## SHUTREX

Mold Release Agen

### FIELD OF APPLICATION

- Use to prevent the adhesion between fresh concrete and the mold/form work made by plywood, steel or aluminium
- Easy release of the concrete from the molds to have a clean and good look concrete

### KEY BENEFITS

- Easy separation of concrete and formwork
- Concrete surfaces without pores and shrink holes
- Harmless for the environment
- Protection against corrosion on steel formwork

# WATER PROFFING PRODUCTS

## DRYTEX HB500 High Build Waterproofing

### FIELD OF APPLICATION

- Roof waterproofing (All types)
- Terrace, balcony and wet areas waterproofing
- Podium, bathrooms, wall waterproofing
- Planters area waterproofing

### KEY BENEFITS

- Seamless waterproofing
- Easy application at site with no hazard
- Environmental friendly
- All weather and good for all types of materials

## DRYTEX CEM HB Polymer Modified Cementitious Waterproofing

### FIELD OF APPLICATION

- Swimming pool waterproofing
- Water tank waterproofing
- Septic tank waterproofing
- Under the tile wet areas waterproofing

### KEY BENEFITS

- Seamless waterproofing for concrete structures
- Green building construction product

# WATER PROFFING PRODUCTS

## DRYTEX CW400

### Crystalline Waterproofing

#### FIELD OF APPLICATION

- All concrete structures, applying a crystalline waterproof coating to make the concrete structure water tight and proof
- Basements
- Pools and tanks
- Precast elements

#### KEY BENEFITS

- Self healing barrier to the water penetration using the natural process of crystallization
- Ideal solution for a wide range of critical infrastructure, where water damage and moisture-related issues occurs

## HYDROPUG

### Instant Water Plug

#### FIELD OF APPLICATION

- Uses to stop the running water or seepage through holes or cracks in concrete
- Masonry walls, pools, water reservoirs, tunnels etc

#### KEY BENEFITS

- Rapid setting to arrest water
- High resistance to pressure
- Non-toxic and can be used underwater
- Sets above and below water

# INDUSTRIAL FLOORING SYSTEM & PRODUCTS

## FLOORFORT 100

PART A+B

Epoxy floor  
Coating system

### FIELD OF APPLICATION

- Car park flooring
- Warehouse and storage area flooring
- Garbage area flooring
- Auto garages

### KEY BENEFITS

- Seamless flooring
- Resistant to oil
- Washable
- Different colours

## FLOORFORT PU

PART A+B

Polyurethane floor  
coating system

### FIELD OF APPLICATION

- Basement and out door car park flooring
- Stairs and steps
- Pump and MEP rooms
- Exposed out door floors

### KEY BENEFITS

- Seamless flooring
- Water resistant flooring
- Different colours
- Resistant to chemicals and UV

# INDUSTRIAL FLOORING SYSTEM & PRODUCTS

## FLOORFORT ES100 PART A+B+C

Heavy duty Epoxy self levelling

### FIELD OF APPLICATION

- Heavy duty industries flooring
- Chemical factories flooring
- Automobile industries flooring
- Oil refineries and metal treatment plants

### KEY BENEFITS

- Superior resistance to abrasion
- High strength and durability
- Good griping surface
- Resistance to chemicals

## FLOORFORT EF PART A+B+C

Food Grade Epoxy flooring

### FIELD OF APPLICATION

- Food and beverage industry flooring
- Pharma industries and laboratories flooring
- Hospitals and restaurants
- Commercial Kitchen

### KEY BENEFITS

- Antimicrobial that inhibits up to 99.99% of bacteria
- Good griping surface
- Health and environmental safe
- Resistance to chemicals

# INDUSTRIAL FLOORING SYSTEM & PRODUCTS

## FLOORFORT FG EXTREME PART A+B+C P.U Flooring System

### FIELD OF APPLICATION

- Food and Beverage industry flooring
- Meat factories
- Cold storages
- Sugar industries

### KEY BENEFITS

- Highly chemical resistant
- Temperature -50 degree C withstand
- Super Hygienic
- Health friendly

# SPECIALIZED CONSTRUCTION PRODUCTS

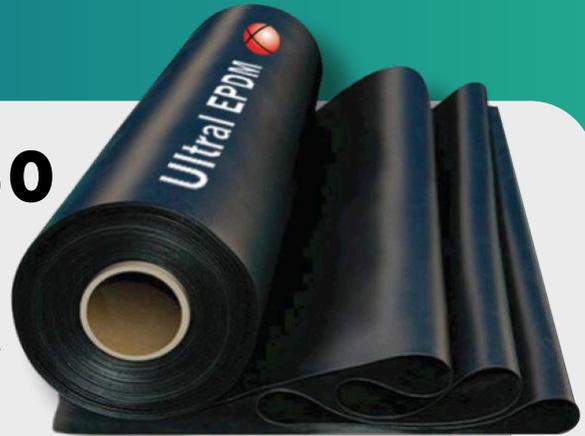

## ULTRAL EPDM 150 EPDM Membrane

### FIELD OF APPLICATION

- Roof waterproofing for high end projects (Airports, Luxury homes, Govt buildings, Five star hotels)
- Façade and Curtain wall vapor barrier
- Aluminium and glass façade finish void sealing
- Pond lining

### KEY BENEFITS

- 25 years warranty N
- 100% saturated material
- Highly flexible and elastomeric
- UV stable

## D FIX Rubber Bonding Adhesive

### FIELD OF APPLICATION

- EPDM bonding adhesive
- Bonding of various construction materials

### KEY BENEFITS

- Easy application by brush
- Extreme adhesion properties
- Suitable for all types of surfaces
- Moisture curing method

# SPECIALIZED CONSTRUCTION PRODUCTS

## FLEXIK RM

### Reinforcement mat FIELD OF APPLICATION

- All concrete structures, applying a crystalline waterproof coating to make the concrete structure water tight and proof
- Basements
- Pools and tanks
- Precast elements

### KEY BENEFITS

- Self healing barrier to the water penetration using the natural process of crystallization
- Ideal solution for a wide range of critical infrastructure, where water damage and moisture-related issues occurs

## ALLWELD

### Instant seal, fix and bonding

### FIELD OF APPLICATION

- Uses to stop the running water or seepage through holes or cracks
- in concrete
- Masonry walls, pools, water reservoirs, tunnels etc

### KEY BENEFITS

- Rapid setting to arrest water
- High resistance to pressure
- Non-toxic and can be used underwater
- Sets above and below water
